The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perez (FR 1,047,276) taken with Barone (Des 95,215).

Perez discloses multiple lollipops extending from multiple sticks. Similarly Barone discloses a two-headed lollipop. These references show that it is well known in the art to provide more than one lollipop on a stick. The claims appear to differ from the reference in the arrangement of the lollipops about the stick. It would have been obvious to one of ordinary skill in the art, upon viewing the lollipops of the prior art to provide a wheel of four lollipops in place of a line of lollipops in order to provide a more decorative arrangement of lollipops. Such a wheel of lollipops would be expected to be easier to hold and twirl to provide for ready access to the supplemental flavors or shapes of lollipops that are provided on the additional stick.
